

Answer

a. Youths and involvement in politics

As far as I'm concerned youths must take part in politics because by their voices, they can change the situation of their countries not only in politics but also in the others sectors. In addition to this youths are consider as men of the futur who are going to manage their countries. What's your opinion about this subject
You are sharing the same opinion with me or no?

b- youths and new fashion

as for me, I agree with youths to carry on fashion because me too I like fashion since we are in the same generation and we could understand each other however some times we find some indecency cloths or the most of it who're suitable with our religion and our culture so that we could adopt fashion but on condition that we wear cloths who're suitable with our religion. What do you think about it? You are agree or disagree with me.

C – youths and voluntary work

To my eyes, I completely agree with youths in this point because they want to rely or themselves moreover build up their personalities in dependently in addition to this they don't want anyone to give them orders, they're some of them who aren't success since they can't stand. So as to get what you want you must work hard and seriously. What about you opinion in this point? You think so or no.
